

## *Signature Wedding Package*

A magical experience of music, lights & bubbles. My Signature Reception Represents the highest level of personalized service I offer. Your reception will be designed especially for you including all the elements we offer, along with those you want to create! Elements may include Custom Introductions, Personalized Recordings, Mystic Haze or First Dance Bubble Experience, and more! My rates are custom designed with the elements you desire and your budget in mind.

The absolute best way to assure the most unforgettable and fun reception possible is to have two entertainers at your reception. The signature includes DJ/Music Programmer and adds an additional Master of Ceremonies for the most complete and interactive dance floor experience. The dynamic of two performers makes a tremendous difference in the energy and excitement of your celebration. With two performers, your DJ can completely focus on your music request and program changes on-the-fly as only an expert DJ can. The second performer is your Master of Ceremonies, and his energies are focused on the flow of your reception. Your Master of Ceremonies will coordinate the entire evening, including Introductions, Toasts, and other formalities you wish to include.

Our State of the Art Sound System is upgraded with extra speakers delivering perfect sound, as well as my wireless microphone that allows the toast to be delivered any where in the room. My complete coordination of the details will assure your celebration is exactly the way you want it and runs smooth.
